

MANAGEMENT DISCUSSION AND ANALYSIS REPORT**INDUSTRY STRUCTURE AND DEVELOPMENT**

On macroeconomic front the financial year 2018-19 was among the most challenging years. The policy and governance environment impacted the economic scenario. Persistent inflation resulted in the regulator raising the policy rates leading to a high interest-rate environment.

There has been a slowdown in the economy visible in many sectors primarily on account of falling exports due to European economic crisis, high rate of interest caused by steep inflationary trend and unprecedented high price of crude in the global market. Many sectors including the finance and investment operations have been adversely affected by both domestic and external factors. The cost of funds being very high it was a difficult year not only for the manufacturing units but also for the Companies operating in the investment and the financial sector. The unfavorable investment climate in the country coupled with significantly low inflow of foreign investment kept the stock market weak for the major part of the year. In an effort to maintain a balance between growth and inflation, RBI is seemingly more concerned about high inflation than slow rate of growth. The financial sector is eagerly waiting for the fall in inflation followed by the rate cut which is likely to help the sector regaining its lost ground.

STRENGTH/ OPPORTUNITIES AND THREATS

The Company yet to work out its future working strategy. The management will strengthen its working force to keep pace with the market condition as and when it plans to start activities at certain level.
