MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Annexure-VI

ECONOMIC SCENARIO

The Prevailing Geo political uncertainties, ongoing conflict between Ukraine & Russia, strained relation among several countries and inflationary pressure, have impacted the economies of the World. The imposition of Tariff plus Penalty by the United States, on exports of several countries has impacted Global Trade and World Economies are going to witness a downward trend. As per World Economic Outlook (issue April, 2025), Global Growth is projected to drop to 3 percent in 2026. In spite of several Global Challenges, India, world's fourth largest Economy, has emerged as the fastest growing economy, projected to grow at 6.50 % for FY 2026 (as per RBI). PM vision of Atmanirbhar Bharat has promoted Innovation, Entrepreneurship and New Technology, which will help Indian Economy to grow at a faster rate in comparison to the other large economies of the world, which are facing difficult times. India is on the track to become the Third largest economy by 2030.

To put the Indian economy on the faster pace of growth and sustainability development, Government introduced several path breaking initiatives and policies in the area of Infrastructure, Social Welfare and Health Care sector to support the economic activities.

Moreover, India has already Signed Free Trade Agreement (FTAs) or Comprehensive Economic Partnership Agreements (CEPAs) with several countries like United Kingdom, Sri Lanka, Nepal, Bhutan, Maldives, Thailand, Singapore, Malaysia, Japan, South Korea, Mauritius, United Arab Emirates (UAE), Australia, ASEAN bloc (10 nations under goods / services / investment FTA), which will help the country to boost its exports to these countries. The negotiation with the European Union, Canada and others are still going on and we are hopeful that agreement will be finalized shortly and will benefit the Indian Economy to grow at much faster rate.

INDUSTRY STRUCTURE AND DEVELOPMENTS

Despite global uncertainties, India's textile and apparel sector demonstrated resilience and adaptability, maintaining competitiveness on a global scale. India is the world's 3rd largest exporter of Textiles and Apparel. India ranks among the top five global exporters in several textile categories, with exports expected to reach US\$100 billion by FY 2030.

The Textile Industry continues to play a dominant role in the economic growth of the country. Its importance is evident from the fact that it is the largest contributor towards employment generation employing 4.5 Crores

workers directly & indirectly, contributing 13% to Industrial Output and 12% to Export earnings. The textiles and apparel industry also contribute 2.3% to the country's GDP. The textile industry in India is projected to double its contribution to the GDP, rising from 2.3% to approximately 5% by the end of this decade. The market for Indian textiles and apparel is projected to grow at Compound Annual Growth Rate (CAGR) of 10% to reach US\$ 350 billion by 2030. (Source: <https://www.ibef.org/industry/textiles>)

The Government is also conscious of the importance of the Textile Industry and has introduced several schemes to enhance textile production, boost investments and promote exports. The Union Budget announced an outlay of Rs. 5,272 Crores for the Ministry of Textiles for 2025-26. This is an increase of 19% over budget estimates of 2024-25 (Rs. 4,417.03 Crores) and will help the Textile industry favorably. Bharat Tex 2025, India's largest global textile event, was successfully organized from 12-15 February, 2025 at India Expo Centre and Mart, Greater Noida and from 14th to 17th February, 2025, at Bharat Mandapam, New Delhi. Bharat Tex 2025 served as a platform to accelerate the government's "Farm to Fibre, Fabric, Fashion and Foreign Markets" vision. The event demonstrated India's leadership in the textile sector and its commitment to innovation, sustainability and global collaboration.

We are hopeful that the Government through its monetary and other policy initiatives will also support the industry in their difficult times so that it could meet the challenges and emerge as a winner.

In line with the global trends and to remain competitive, your company is also going in for modernization of its spinning units at various locations, by adding ultra-modern machineries at a capital outlay of Rs. 325 Crores (approx.). The company is also putting up 11 M.W. Solar PV System at a capital outlay of Rs. 25 Crores, for its own consumption. This will help the company in improving quality as well as operational efficiencies and will enable the company to diversify and increase its exports to quality conscious markets of U.S. and European Union.

OPPORTUNITIES AND THREATS

The textile industry faces a mix of challenges as well as opportunities. The industry has the opportunity for growth through various Free Trade Agreement (FTAs) / Comprehensive Economic Partnership Agreements (CEPAs) with several countries which will help the country to increase its exports.

The rapid growth of retail sector and with the entry of

several international & domestic players like GAP, Mark & Spencer, Amazon, Reliance Retail etc. in the Indian markets is going to boost the domestic markets. Moreover, the growing consumerism and household income will also add to the fortunes of the textile industry.

Presently, China is a major exporting country to the World Economies and has 30% share of Global Textile Market. Because of strained relations between U.S. and China, importing buyers are interested in reducing their dependence on one country and they have started following 'China plus One' Policy. Thus, 'China plus One' is a Golden opportunity to the textile industry. India should capitalize on this opportunity and present itself as a credible alternative. India certainly has an edge to be an alternative manufacturing hub for global players as two major things required to run textile Industry are cotton and skilled work force and they are abundantly available in the country. The Government is also providing supportive environment to further enhance and modernize capabilities and establish India as a global Market Hub for International Buyers.

Though the future of textile is bright but the industry also faces some challenges too. The key challenge is the recently imposed Trade Tariff of 25% plus penalty by the U.S. on India's exports. This is going to affect country's exports of textile products to U.S. We hope that India will renegotiate the trade deal with the U.S. and the matter will be resolved in the coming periods. We feel that trade tariff is likely to act as short-term deterrent rather than a structural disruption in the Global Trade. To mitigate the impact of High Trade Tariffs industry must diversify into alternative export markets such as Latin America, Africa and South East Asia so that the negative impact on exports is nullified.

The other key challenge is to focus on the manufacturing excellence. The textile industry is a fragmented industry and is not spending required capital on R&D and ultra-modern machinery so that it can produce highly quality products and ensure cost effective production. The industry must make investment in product innovation and R&D which will help the industry to export its products to quality conscious markets of U.S. and European Union.

We are of the opinion that India continues to offer several advantages - availability of good quality raw cotton, skilled and cost effective manpower, stable policy environment, diverse textile offering which would continue to attract Global companies to shift their manufacturing base to India.

FUTURE OUTLOOK

The future of the Textile industry seems to be good. Though there are some short term set back in the form of

U.S. Tariffs of 25% plus penalty on India's export to U.S. which will make India's export costlier as compared to Bangladesh, Vietnam, and Indonesia etc. as they are having lower tariff on their exports. We are hopeful that things will settle shortly and industry will establish itself as a global manufacturing hub for the International buyers.

Besides, Free Trade Agreement (FTA)/Comprehensive Economic Partnership Agreements (CEPAs) with several countries which will play an important role in increasing the textile export to these countries. Your management is looking at the future with optimism and expects improvement in global scenario in coming periods, which will give relief to the Textile Industry. We expect that in this challenging period, Government will support the Spinning industry in the form of favorable Textile policies, incentives and other benefits which are of paramount importance for the future growth of the Industry.

RISK AND CONCERNS

No industry is free from normal business risk and concerns. Indian Textile Industry continues to face stiff competition from small countries like: Bangladesh, Taiwan, Vietnam and other emerging economies. The recently imposed Trade Tariff by the U.S.A on Indian exports is a serious setback for the Industry. This is going to affect India's exports of textile product to U.S. We hope that India will renegotiate the trade deal with the U.S.A and the matter will be resolved shortly. We feel that the trade tariff is likely to act as short-term deterrent rather than a structural disruption. The country must also diversify and increase its exports to other countries so that it can meet the challenges.

The relative competitiveness of Industry is dependent upon the raw cotton prices, exchange rates and prevalent interest rates regime. The primary raw material for the manufacturing of yarn is cotton which is an agriculture produce. Its supply and quality are subject to forces of nature i.e. Monsoon. Any significant increase in the prices of raw cotton will make things difficult for the Textile Industry resulting weak demand and thin margins. So availability of raw cotton at the reasonable prices is crucial for the spinning industry. Any significant change in the raw cotton prices can affect the performance of the Industry.

The high rate of interest and electricity cost are affecting the financial performance of the Textile Industry. The Spinning industry being more capital intensive requires huge funds, long term as well as short term in the form of working capital for its running. The Government must support the industry by providing finance at lower interest rates so that the industry remains financially viable. Likewise the government should also provide the

Electricity at concessional rate to the industry so that it can compete in the global markets.

The prevailing geo political situations coupled with Trade Tariff by U.S. has caused supply chain disturbance and has affected global trade. The future is still uncertain and no one knows where it will lead to us? Thus, your Company considers it a possible risk and concern to the Industry.

In addition to the above, the other concerns like higher transaction costs, increasing labour cost and prices of raw material are posing risks to the growth of Indian Textile Industry. The Government should extend a helping hand to the existing Textile Units so that they can become globally competitive and contribute towards the growth of the country.

We believe that the audit evidence obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate

opinion on these matters. There is no key matters to be communicated in our report.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including annexures to the Board's Report and Management Discussion & Analysis Report, but does not include the standalone financial statements and our auditors' report thereon. The Board's Report including annexures to the Board's Report and Management Discussion & Analysis Report is expected to be made available to us after the date of this auditors' report.

Our opinion on the standalone financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit, or otherwise appears to be materially misstated. When we read the Board's Report including annexures to the Board's Report and Management Discussion & Analysis Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance, if there is no material misstatement, we will not issue separate report in this regard.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy

and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

We have audited the internal financial controls over financial reporting of **NAHAR SPINNING MILLS LIMITED** ("the Company") as of March 31, 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the

risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial

controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

All assets and liabilities have been classified as current or non-current as per Company's normal operating cycle and other criteria set out in the Schedule III to the Act.

(b) Foreign currency translation

Items included in the financial statements of each of the company's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is company's functional and presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in the Statement of profit and loss.

(c) Revenue recognition

(i) Revenue arises mainly from the sale of manufactured and traded goods. To determine whether to recognise revenue, the Company follows a 5-step process:

1. Identifying the contract with a customer
2. Identifying the performance obligations
3. Determining the transaction price
4. Allocating the transaction price to the performance obligations
5. Recognising revenue when/as performance obligation(s) are satisfied.

Revenue is measured at fair value of consideration received or receivable, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the government which are levied on sales such as goods and service tax, etc.

Revenue is recognised either at a point in time or over time, when (or as) the Company satisfies performance obligations by transferring the promised goods or services to its customers.

Sale of goods

Revenue from sale of goods is recognised when the control of goods is transferred to the buyer as per the terms of the contract, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods. Control of goods refers to the ability to direct the use of and obtain substantially all of the remaining benefits from goods.

Rendering of services

Revenue from services is recognised as and when the services are rendered and on the basis of contractual terms with the parties.

- (ii) Export Incentives- Export incentives are recognised on post export basis.
- (iii) Interest income - Interest income is recognised on accrual basis.
- (iv) Dividend income - Dividends are recognised in profit or loss only when the right to receive payment is established

- (vii) Income and other Claims -Revenue in respect of claims is recognised when no Significant uncertainty exists with regard to the amount to be realised and ultimate Collection thereof .

(d) Government Grant

Grants from the government are recognised at their fair value when there is a reasonable assurance that the grant will be received and the company will comply with all attached conditions.

Government grant relating to income are deferred and recognised in the profit or loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

Government grants relating to purchase of property, plant and equipment are included in non-current liabilities as deferred income and are recognised in the statement of profit or loss over the period of useful life of asset.

(e) Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction by the end of the reporting period adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses. . Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends

either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in the Statement of profit and loss, except to the extent that it relates to items recognised in other comprehensive income, In that case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(f) Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

(g) Cash and Cash Equivalents :

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, other bank balances and bank overdrafts.

(h) Inventories

Inventories are valued at cost or net realizable value, whichever is lower. However to determine the cost, the following methods are adopted:-

1. a) For Raw Material on moving weighted average method plus direct expenses.
b) For Stores and Spares on moving weighted average method plus direct expenses
c) For Work - in - Process, cost of Raw Material plus appropriate share of manufacturing expenses/ relevant Overheads/conversion cost depending upon the stage of completion.
2. For Finished goods, cost of raw material plus conversion costs, packing cost and other overheads incurred to bring the inventories to their present condition and location.
3. Further Wastage and Rejections are valued at net realizable value only.
4. Goods in Transit are valued at cost.

(i) FINANCIAL ASSETS

(i) Classification

- The company classifies its financial assets in the following measurement categories -
- Those to be measured subsequently at fair value (either through other comprehensive income or through Statement of profit and loss), and
- Those measured at amortised cost

The classification depends on the company's business model for managing the financial assets and the contractual terms of cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the company has made an irrevocable election at the time of initial recognition to account for the equity investment at the fair value through other comprehensive income.

(ii) Measurement

At initial recognition, the company measures a financial asset at its fair value plus transaction cost that are directly attributable to the acquisition of the financial asset. In the case of a financial asset at fair value through profit or loss, transaction costs of financial assets are expensed in the Statement of profit and loss.

The company subsequently measures all equity investments at fair value. Where the company's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss.

(iii) Impairment of financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less cost of disposal and its value in use.

The company assesses on a forward looking basis the expected credit losses associated with its assets

carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables only, the company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

(iv) Derecognition of financial assets

A financial asset is derecognised only when

- The company has transferred the rights to receive cash flows from the financial asset or
- Retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

(j) Impairment of Non-Financial assets

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable amount. The recoverable amount is higher of an asset's fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from assets or group of assets (cash generating units). Non- Financial assets suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period

(k) Non- Current assets held for sale:

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and sale is considered highly probable. They are measured at lower of their carrying amount and fair value less cost to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt

Non-current assets are not depreciated or amortised while they are classified held for sale. Interest and other expenses attributable to the liabilities of disposal, company classified as held for sale, continue to be recognised.

(l) Derivatives that are not designated as hedges

The company enters into certain derivatives/forward contracts to hedge foreign currency risks which are not designated as hedges. Such contracts are accounted for at fair value through profit or loss

(m) Property, plant and equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and impairment if any. Cost directly attributable to acquisition are capitalised until the property, plant and equipment are ready for use.

Depreciation methods, estimated useful lives and residual value

The company depreciates its property, plant and equipment over the useful life in the manner prescribed in the Schedule II to the Companies Act, 2013.

- a) In Garment Division at Ludhiana, depreciation is charged on W.D.V. basis
- b) In all other units, depreciation is charged on Straight Line basis The residual values are not more than 5% of the original cost of the assets.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other 'non-current assets' and the cost of assets not put to use before such date are disclosed under 'Capital work-in-progress'.

Subsequent expenditures relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably.

Repairs and maintenance costs are recognized in the Statement of Profit and Loss when incurred.

The cost and related accumulated depreciation are eliminated from the financial statements upon sale or

retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit and Loss.

Depreciation methods, useful lives and residual values are reviewed periodically, including at each financial year end.

(n) Investment Properties

Property that is held for long term rental yields or for capital appreciation or both, and that is not occupied by the company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the company and cost of the item can be measured reliably.

Investment properties are depreciated using the written down value method over the useful life of 60 years.

(o) Intangible assets Computer software

Computer software are stated at cost less accumulated amortisation and impairment, if any.

Amortisation methods and periods

The company amortises the computer software with a finite useful life over the period of 6 years.

(p) Trade and other payables

These amounts represent liabilities for goods and services provided to the company prior to the end of financial year which are unpaid.

(q) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using effective interest method.

Borrowings are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

(r) Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of the asset. Other borrowing costs are recognized as an expense in the period in which they are incurred.

(s) Provisions and contingent liabilities

Provisions are recognised when the company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

Contingent Liabilities are disclosed in respect of possible obligations that arise from past events but their existence will be confirmed by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made.

(t) Employee benefits

(i) Short term obligations

Liabilities for wages and salaries, including non-monetary benefits if any, that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

(ii) Other long term employee benefit obligations

The liabilities if any, which needs to be settled after 12 months from the end of the period in which the employees render the related services are measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of reporting period using the projected unit credit method.

(iii) Post-employment obligations

The liability or asset recognised in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligations at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

(iv) Defined contribution plans

Contribution to Provident Fund is made in accordance with the provisions of the Employees Provident Fund and Miscellaneous Provisions Act, 1952 and is charged to the Statement of Profit and Loss.

(u) Estimates and judgements

The preparation of financial statements requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management has made judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities as at the date of financial statements and reported amount of income and expenses during the period.

The areas involving critical estimates or judgements are:

- Estimation of current tax expense and payable
- Designation of financial assets /liabilities through FVTPL
- Estimation of defined benefit obligation
- Recognition of deferred tax assets for carried forward tax losses

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on company and that are believed to be reasonable under the circumstances.

(v) Cash Flow Statement :

The cash flow statement is prepared in accordance with the Indian Accounting Standard (Ind AS)-7 "Statement of Cash Flows" using indirect method for operating activities.

(w) Earning per share

(i) Basic earning per share

Basic earning per share is calculated by dividing :

- The profit attributable to equity share holders and
- By the weighted average number of equity shares outstanding during the financial year.

(ii) Diluted earning per share

Diluted earning per share adjusts the figures used in the determination of basic earning per share to take in to account :

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and

- The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

(x) Recent Indian Accounting Standards (Ind AS) issued not yet effective

Ministry of Corporate Affairs (“MCA”) notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time

Effective 1 April 2025, the Company has adopted the amendments to **Ind AS 21 – The Effects of Changes in Foreign Exchange Rates**, issued via the **Companies (Indian Accounting Standards) Amendment Rules, 2025**.

As per the amended standard, where a currency is not exchangeable into another currency at a measurement date for a specified purpose, the Company estimates the spot exchange rate that would reflect the rate at which an orderly exchange transaction would take place between market participants under prevailing economic conditions.

The estimation process considers observable exchange rates, including those available for other purposes or subsequent to the restoration of exchangeability, and applies alternative estimation techniques where appropriate.

Disclosures are made regarding:

- The nature and financial effects of currencies not being exchangeable;
- The estimated exchange rates used;
- The estimation process followed;
- The associated financial risks.

The Company does not expect the effect of this on the financial statements to be material, based on preliminary evaluation.

31. Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimating uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Defined benefit plans (gratuity benefits)

The cost of the defined benefit gratuity plan and other post-employment benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific countries. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates. Further details about gratuity obligations are given in Note 35.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using other valuation techniques. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model.

32. Financial risk management objective and policies

The Company's principal financial liabilities comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations and to support its operations. The Company's financial assets include loans, trade and other receivables, and cash & cash equivalents that derive directly from its operations. The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a financial risk committee that advises on financial risks and the appropriate financial risk governance framework for the Company. This financial risk committee provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedure and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each risk, which are summarised as below:

(A) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: 'interest rate risk, currency risk and other price risks. Financial instruments affected by market risk include loans and borrowings, deposits and payables/receivables in foreign currencies.

a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to 'the risk of changes in market interest rates relates primarily to the Company's long term debt obligations with floating interest rates. The company is carrying its borrowings primarily at variable rates. For floating rates borrowings, the

analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point Increase or decrease is used when reporting interest rate risk internally to Key management personnel and represents management's assessment of the reasonably possible change in interest rates.

	31st March 2025	31st March 2024
Variable rate borrowings	49,725.77	78,953.65
Fixed rate borrowings	60,362.17	36,147.82

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variable held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

	Effect on Profit before tax	
	31st March 2025	31st March 2024
Increase by 50 basis points	(248.63)	(394.77)
Decrease by 50 basis points	248.63	394.77

b) Foreign currency risks

Foreign currency risk is the risk that the fair value of future cash flows of an exposure will fluctuate because of changes in International currencies as part of the business is transacted in foreign currencies and consequently the company is exposed to foreign exchange risk. The Company's exposure in foreign currency is in loans, trade receivables, advances and trade payables etc.

iii) Price risk

The Company's exposure price risk arises from investments held and classified in the balance sheet either as fair value through other comprehensive income or at fair value through profit or loss. To manage the price risk arising from investments, the Company diversifies its portfolio of assets.

B) Credit risk

Credit risk is the risk that counter party will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables)

Credit risk management

The Company assesses and manages credit risk based on internal credit rating system. Internal credit rating is performed for each class of financial instruments with different characteristics. The Company assigns the following credit ratings to each class of financial assets based on the assumptions, inputs and factors specific to the class of financial assets.

(i) Low credit risk on reporting date

(ii) Moderate credit risk

The Company provides for expected credit loss based on the following:

Asset group	Basis of categorisation	Provision for expected credit loss
Low credit risk	Cash and cash equivalents, other bank balances, loans, trade receivables and other financial assets	12 month expected credit loss
Moderate credit risk	Trade receivables and other financial assets	Life time expected credit loss or 12 month expected credit loss

Based on business environment in which the Company operates, a default on a financial asset is considered when the counter party fails to make payments within the agreed time period as per contract. Loss rates reflecting defaults are based on actual credit loss experience and considering differences between current and historical economic conditions.

Assets are written off when there is no reasonable expectation of recovery, such as a debtor declaring bankruptcy or a litigation decided against the Company. The Company continues to engage with parties whose balances are written off and attempts to enforce repayment.

Recoveries made are recognised in statement of profit and loss.

Cash & cash equivalents and bank deposits

Credit risk related to cash and cash equivalents and bank deposits is managed by only accepting highly rated banks and diversifying bank deposits and accounts in different banks across the country.

Trade receivables

Credit risk related to trade receivables are mitigated by taking bank guarantees/letter of credit, from customers where credit risk is high.

The Company closely monitors the credit-worthiness of the debtors through internal systems that are configured to define credit limits of customers, thereby, limiting the credit risk to pre-calculated amounts. The Company assesses increase in credit risk on an ongoing basis for amounts receivable that become past due and default is considered to have occurred when amounts receivable become one year past due.

Other financial assets measured at amortised cost

Other financial assets measured at amortized cost includes loans and advances to employees, security deposits and others. Credit risk related to these other financial assets is managed by monitoring the recoverability of such amounts continuously.

(i) Trade Receivables

Customer credit risk is managed by each business location subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed and individual credit limits are defined in accordance with the assessment both in terms of number of days and amount.

An impairment analysis is performed at each reporting date on an individual basis for major clients. In addition, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets disclosed in Note 6.1 Trade receivables are unsecured but considered good subject to provision made thereon.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company includes within net debt, interest bearing loans and borrowings, trade payables, less cash and cash equivalents.

Level 1 : Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, mutual funds that have quoted price. The fair value of all equity instruments which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2 : The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Level 3 : If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

Total financial liabilities	1,06,536.37	1,06,536.37	1,08,587.65	1,08,587.65

The carrying amounts of trade receivables, trade payables, advances to employees, cash and cash equivalents and other bank balances are considered to be the same as their fair values, due to short term nature.

The fair values for security deposits were calculated based on cash flows discounted using a current lending rate. They are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.
