Financial Highlights

3B Binani, on a consolidated basis, reported a further improvement in its operating performance in the year 2017-18. The total revenue increased by 6.8% mainly driven by an increase in sales volume. Profit before Depreciation, Interest and Taxation increased also by 4.6% versus last year (2016-17). The improvement is mainly driven by robust market conditions and continuing commercial efforts which enabled us to increase the sales volume. The ongoing implementation of the profitability improvement plan covering all key financial drivers also strongly contributed to the overall performance improvement. On top of these internal factors, the net profit improvement is also partially driven by the weakening of the dollar and the associated impact on the revaluation of the acquisition loan.

Industry Overview

The European Market in 2017 was really strong with an average growth estimated at 7.7% versus 2016. CS grew significantly +13.2% together with Mat +13.0%. The growth in CS was supported by a robust automotive market. On the other hand, DR grew a small 1.7% amid some concern on the back of the wind industry expected to slow down due to the shift in the support mechanism in Germany and the UK. In India, the Glass fibre Industry is estimated to have grown by a CAGR of 7% during the period 2011 – 2016. Demand was affected though in 2017, as Indian economy suffered the impact of demonetisation (Oct 16), the GST implementation (July 17) and the temporary slowdown of the Wind Industry. Glass fibre consumption is estimated to have slightly come down, -4.7% from last year. The economy in India is expected to be back on track by 2018. Glass fibre demand will then follow with an expected growth of 7% per year.

Market outlook

3B Binani will continue to focus on its core markets Automotive, Wind and Performance Composites, supplying these markets with high quality Chopped Strands and Direct Roving products, supported by high performance specialty products like HiPer-tex™ and CFM. 3B Binani still shows a strong focus on innovation to develop value-added products for its customers in order to deliver product differentiation, to improve the profitability and to keep ahead of competition. Looking ahead, the overall demand growth for glass fibre in Europe is expected to continue with the economies remaining robust. In India, the wind market is coming back as expected which is very encouraging for the years to come.

Operations Review

BILIL reported the total income of ₹ 25,126.92 lacs for the year under review as against ₹ 24,574.40 lacs in the previous year. It reported a Profit after Tax of ₹ 583.88 lacs as compared to ₹ 553.22 lacs in the previous year.

Industry Overview

The Year 2017-18 continued to be challenging for BILIL whereas India achieved 7.36% GDP growth as compared to 6.74% in previous year and was globally acknowledged as the world's fastest growing economy. Plethora of opportunities predominantly in Infrastructure, Rail, Road and Power & Renewable Energy had been visible. The Smart City Mission with assured budgetary support to create 100 Smart Cities across India had also bolstered the optimism significantly.

Strong signs of economic revival visible with higher consumer confidence, Industry and Infrastructure sector from the beginning of FY2017-18 with lot of construction tenders floating in infrastructure field. BILIL bagged lot of jobs during 2017-18 aggregating to a total value of ₹440.00 Cr. However due to restrictions in BG limit with Bankers, current financial year i.e. 2018-19 could be a challenging year to bid for further new tenders.

Business Outlook

Stable and visionary Government, policy reforms, strong possibility of simplified Tax regime and continued efforts to improve Ease-of-doing-business have made India a bright spot in global investment map. Higher Govt. spending in key sectors such as Infrastructure, Rail, Road, Port, Power, robust FDI in Manufacturing and defence production will push up growth prospect tremendously.

On-going Policy reforms, divestment of PSU stakes, relaxed FDI norms to allow foreign players in Indian Infrastructure Sector and thrust towards clean Energy and Make-in-India initiative will create investment friendly environment and fuel growth momentum further. This will significantly drive demand in key Industry sectors like Cement, Steel, Mining and other Metals. Overall there will be high growth scenario in a wide spectrum of industries.

However, there is possibility of Govt. funding target not being met. At the same time high debt levels of private Infrastructure players, cautious approach of Banks for new investment proposals and RBI's dictate to banks to be decisive and apply the newly enacted Insolvency and Bankruptcy Code, 2016 (IBC) framework against the erring defaulters with NPA accounts in addition to the traditional land acquisition issues may hold back the pace of private investments and could be potential growth decelerators.

Opportunity and Threats

Higher Govt. spending to build robust infrastructure, single goods and services tax (GST), favorable Govt. approach towards PPP Model, lower fiscal deficit and low interest regime are expected to boost long-term inbound investment actively.

However, rising inflation and high debt levels of large scale Private infrastructure developers may constrain investment in this sector. Inability of Govt. funding through divestment of PSUs may dampen investment scenario further.

Way forward of the Company

In order to ensure growth, we have to book more and more orders and in order to book orders in this competitive market we have no other way but to accept minimum margin. Hence we are looking for more volume and minimum margin in conventional item rate construction contracts.

The only available way of earning more margins is to focus on EPC or Design & Built contracts where there is less competition but it calls for strong credential in respective fields which we are lacking but we have to gradually build it by engaging as JV partner or associate or back to back sub contract.

Company's Growth Plan for next three years

FY 2018-19 → ₹300 Cr from target Order book position of ₹800 Cr

FY 2019-20 → ₹325 Cr from target Order book position of ₹800 Cr

FY 2020-21 → ₹350 Cr from target Order book position of ₹850 Cr

The Board wishes to state as follows:

- Pursuant to a separate Scheme of Amalgamation approved by the Hon'ble High Court at Calcutta between WIEL and a step down wholly owned subsidiary of the Company on 18th March 2014, being the Company as a successor to WIEL, the Company has applied AS 30, the Accounting Standard on Financial Instruments: Recognition and Measurement, issued by the Institute of Chartered Accountants of India (ICAI), and pursuant thereto has as on March 31, 2014, being the date of conclusion of the first Accounting Year post the provisions of AS 30 becoming applicable to the Company, classified the investments as "available for sale financial assets" and has accordingly, measured such investments at fair value as on that date. In the event of any conflict between the provision of AS 30 and any other Accounting Standards, the provision of AS 30 will be applied in preference to any other Accounting standard. BRR shall constitute a reserve arising as per this Scheme and shall not for any purpose be considered to be a Reserve created by the Company. During the year, the Institute of Chartered Accountants of India (ICAI) has withdrawn Accounting Standard 30 (Accounting Standard on Financial Instruments: Recognition and Measurement). Consequent to this, the Company, backed by legal opinion, has applied principles of notified Ind AS related to Financial Instruments being new accounting standards applicable instead of AS 30. All equity investment including Investment in Subsidiaries are designated as fair value through profit & loss. The outstanding aggregate balance of these guarantees is ₹ 590,247 Lacs as on March 31, 2018. The Subsidiaries have sufficient assets to meet their borrowings. Considering the same, in the opinion of the management, these are not expected to result into any financial liability to the Company.
- d. The Company was in the process of restructuring its bank borrowings with the Lender. However, in the interim, the said Lender has communicated to the Company that it is recalling its borrowings and has also designated the foreign currency debt into INR denominated debt with higher coupon rate and has demanded repayment of all out standings including corresponding interest and penal interest immediately. The Company has requested the Lender to defer the recall and has in the interim provided alternative mechanism for repayment of its loans in due course. The Company is awaiting response from the Lender in this behalf. Hopeful of a favourable consideration by the Lender of its alternative mechanism, the Company continues to denominate such loans in Foreign currency and has not classified the outstanding Loan as Current Liabilities. Further, it has also not accrued differential and penal interest.
- e. The final order was passed by the National Company Law Appellate Tribunal on 14th November 2018 approving the resolution plan submitted by Ultratech Cement Limited and post the dismissal of the application by M/s Rajputana Properties Pvt. Ltd. to the Supreme Court on 19th November 2018, the same became effective. However, pending clarity and implementation of the Resolution Plan by Ultratech Cement Limited, no impact has been provided of the said resolution plan in these consolidated financial statements for the year ended March 31, 2018.
