Suitability

When you invest for seven years or above, you can expect gains that comfortably beat the inflation rate and are also higher than fixed income options. This is a fund that invests in smaller companies. Compared to those that invest in larger companies, such funds tend to fall more when stock prices fall. Therefore, you can expect higher returns in the long-term, but more severe ups and downs along the way.

Like all equity funds, you must invest only through the SIP route. Click here to read a primer on SIP investing.

Taxability of earnings:

Capital gains: If the mutual fund units are sold after 1 year from the date of investment, gains upto Rs 1 lakh in a financial year are exempt from tax. Gains over Rs 1 lakh are taxed at the rate of 10%. If the mutual fund units are sold within 1 year from the date of investment, entire amount of gain is taxed at the rate of 15%. No tax is to be paid as long as you continue to hold the units.

Dividends: Dividends paid by the mutual fund scheme are taxed at the rate of 10% (effectively 11.648%, including surcharge and cess). This is known as Dividend Distribution Tax (DDT). Though the investor does not pay this tax directly, it is deducted from the dividend income before passing on to the investor.
