### Suitability

This fund invests mainly in the shares of foreign companies listed outside India. Being passively managed, it replicates the portfolio of its chosen benchmark index. International equity funds are suitable to invest a part of your money for diversification, so that if the Indian markets are going through a sharp correction a portion of your money is insulated. But invest in them only if you have an investment horizon of more than five years, and do so only through the SIP route.

### Taxability of earnings:

- Capital gains:**
- If the mutual fund units are sold after 1 year from the date of investment, gains are taxed at the rate of 12.5%.
  - If the mutual fund units are sold within 1 year from the date of investment, entire amount of gain is added to the investors' income and taxed according to the applicable slab rate.
  - No tax is to be paid as long as you continue to hold the units.

- Dividends:**
- Dividends are added to the income of the investors and taxed according to their respective tax slabs. Further, if an investor's dividend income exceeds Rs 10,000 in a financial year, the fund house also deducts a TDS of 10% before distributing the dividend.
